

SOLUBLE HUMIC ACID
HUMISOL

MINIMUM GUARANTEED ANALYSIS	% BY WEIGHT
Humic acid	50%
<i>Derived from: Leonardite</i>	

Information concerning the raw materials composing this product can be obtained by writing to NUTECH, 5415 Lake Howell Rd. Suite 177, Winter Park, Florida 32792.

Refer to the lot number found on this container for identification.

GENERAL INFORMATION

HUMISOL is a concentrated product of very high solubility which contains humic substances from vegetable origin that increase soil cation exchange capacity and water holding ability, improving nutrient availability and promoting the growth of healthy populations of beneficial microbial organisms.

DIRECTIONS FOR USE

HUMISOL can be used on any crop alone or in combination with dry or liquid fertilizers. It can be applied prior to planting, at planting or at any time after emergence. It can be dissolved and applied to the soil through irrigation or foliar applied, mixed with enough water to obtain thorough foliar coverage. For fertilizer rates suitable to your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist/Certified Crop Advisor or contact NUTECH, 5415 Lake Howell Rd. Suite 177, Winter Park, Florida 32792

USE RECCOMENDATIONS

In combination with fertilizers: HUMISOL is designed for use in combination with fertilizers for more efficient use and uptake. The recommended rate is 10-60 lbs per acre or 1-3% of any physical blend of fertilizer, whichever is greater. Apply HUMISOL ahead of the most critical growth stages of any given crop. Corn, wheat, and other grains: Apply 10-40 lbs./Ac/season as a single or split application in combination with a complete fertilizer program. Banded or in furrow applications are preferred.

Soybeans: Apply 10-20 lbs./Ac as single application, pre-planting broadcast or at planting.
Turf and Ornamentals: Apply 1.25-2.5 lbs/1000 sq ft. in one or multiple applications.
Fruit and Vegetable Crops: Apply 20-60 lbs./Ac/season as a single or split application in combination with a complete fertilizer program. Repeat as needed for optimum performance.
Alfalfa: Broadcast 10-30 lb./Ac for new crop establishment, alone or in combination with dry fertilizer. Repeat maintenance rates of 10-20 lbs/Ac.

NOTICE

The statements made on this label are believed to be true and accurate, but because of conditions of use which are beyond our control, NUTECH does not make, nor does it authorize any agent or representative to make any warranty, guarantee or representation, expressed or implied, concerning this material or the use thereof. Neither NUTECH nor the seller shall be held responsible in any manner for any personal injury or property damage or loss resulting to the buyer or the other persons from handling, storage or use of this material, not in accordance with the directions. The buyer assumes all risk and liability resulting from improper handling, storage or use and accepts and uses this material on these conditions.

PRECAUTIONS

Harmful if swallowed. Avoid contact with skin, eyes or clothing. In case of contact, immediately flush skin or eyes with water for at least 15 minutes. HUMISOL is not phytotoxic when used as directed at the recommended rates. If dissolved, do not mix HUMISOL with any calcium sources or with substances with a pH below 6.0 as incompatibility may occur.
